

## GENERAL

### Price basis

Price quotations apply for 1000 metres of cable. Current prices are calculated according to quotations of the non-ferrous metal-working industry using electrolytic copper for conducting purposes (DEL notice), valid on the day of order receipt, plus purchase costs.

### Copper price

Cables and wires are sold at daily copper prices (DEL). DEL is the stock exchange listing for German electrolytic copper for conducting purposes, that is 99.5% pure copper. DEL is indicated in EUR/100 kg.

### Copper index

Copper index describes the copper weight of each article. If the listed copper index is 68, the corresponding cable contains 68 kg of copper in a length of 1000 metres.

### Copper addition

The copper addition (EUR/km) is calculated as follows:

$$\text{copper addition} = \text{copper index} \times \frac{(\text{DEL} + 1\% \text{ purchase costs}) - \text{copper basis}}{100}$$

(kg/km)

### VAT

Prices are calculated excluding VAT. It will be charged additionally according to the fiscal regulations currently in force.

### Pricing terms

Freight costs included within Germany for a net merchandise value of EUR 1,500.- or more. If the net merchandise value is less than EUR 1,500.-, freight costs will be charged.

### Inland payment terms

Payable within 14 days net.

### Divergences in measurement, weight, quantity and construction

Divergences related to raw materials or production remain reserved. Trade-customary over- or under-deliveries are permitted.

### Short lengths

We reserve the right to deliver up to 10 % of the ordered quantity in short lengths.

### Dimensions metre marking

The metre marking is a guide value and not calibration-capable. It does not serve for verifying the delivered length indicated by the cable manufacturer. Only calibrated measuring instruments are to be used for this purpose.

## ENVIRONMENT PROTECTION

In product manufacturing we refrain from using hazardous substances according to Directive 2002/95/EC - RoHS. We use only lead-free materials in order to protect our environment. Cable residues, pilot and rejection products are mainly reused at our production sites. Residues of synthetic materials are re-employed in the production process. Furthermore we use recyclable materials for all our packaging and support materials.

Our return service for wooden drums can also help contribute to environment protection. We return your empty wooden drums free of charge, and we can use them repeatedly without losing quality, or without wasting valuable resources.

For drum return please contact:
